

Mountain Shade

-Islam Nusrat Akhi

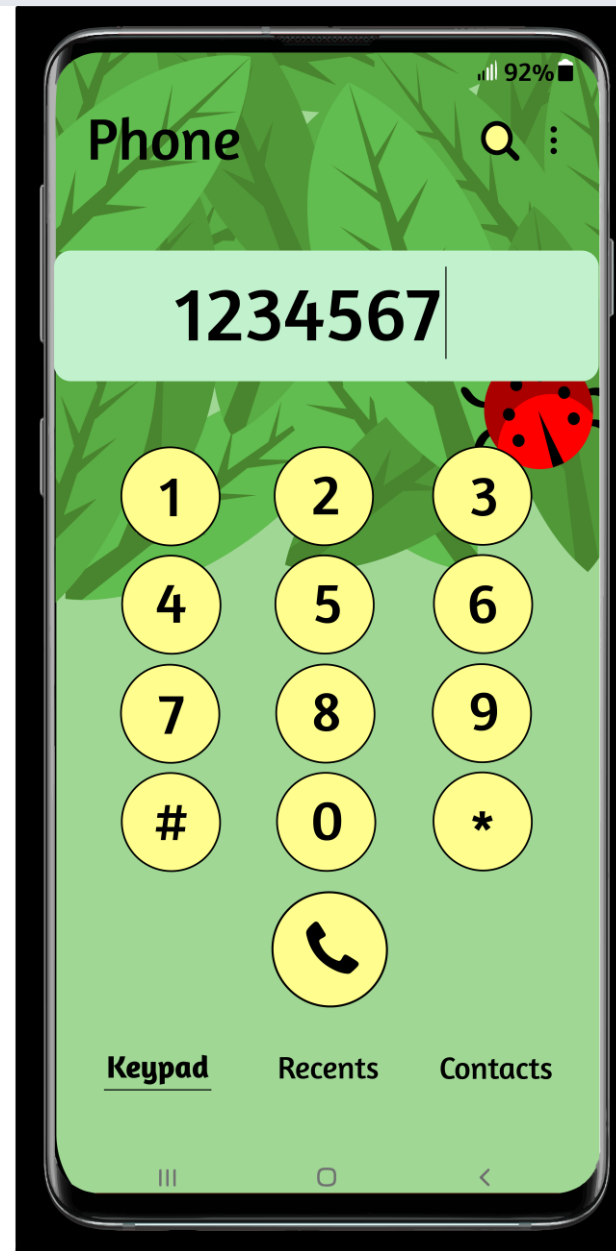

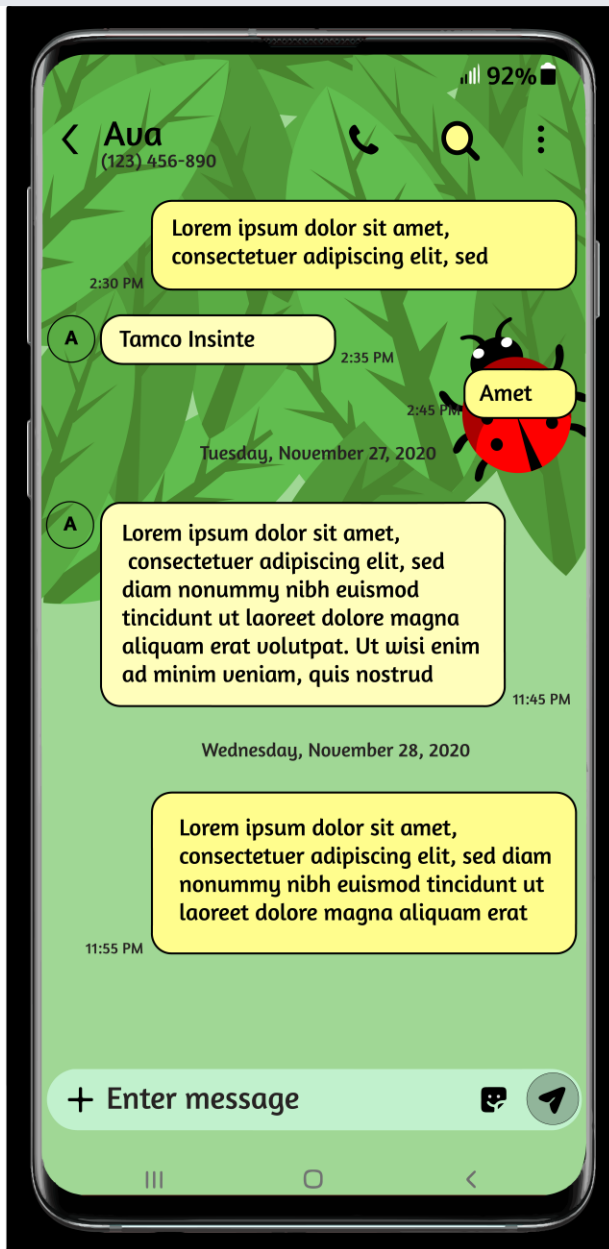

A Ladybug

-Islam Nusrat Akhi

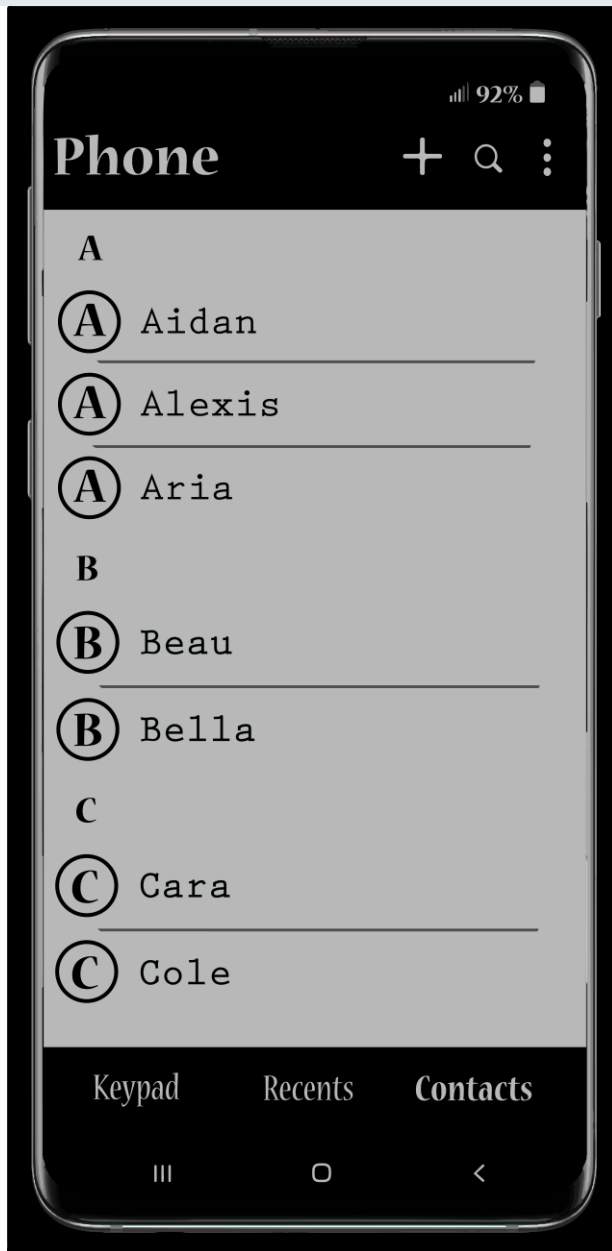

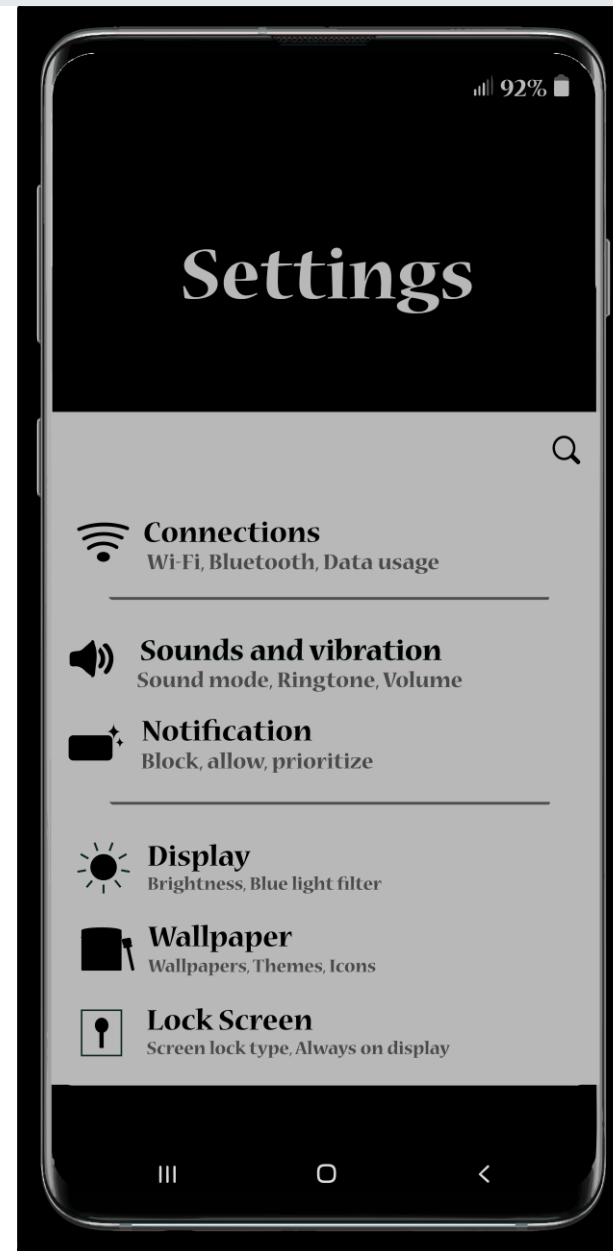

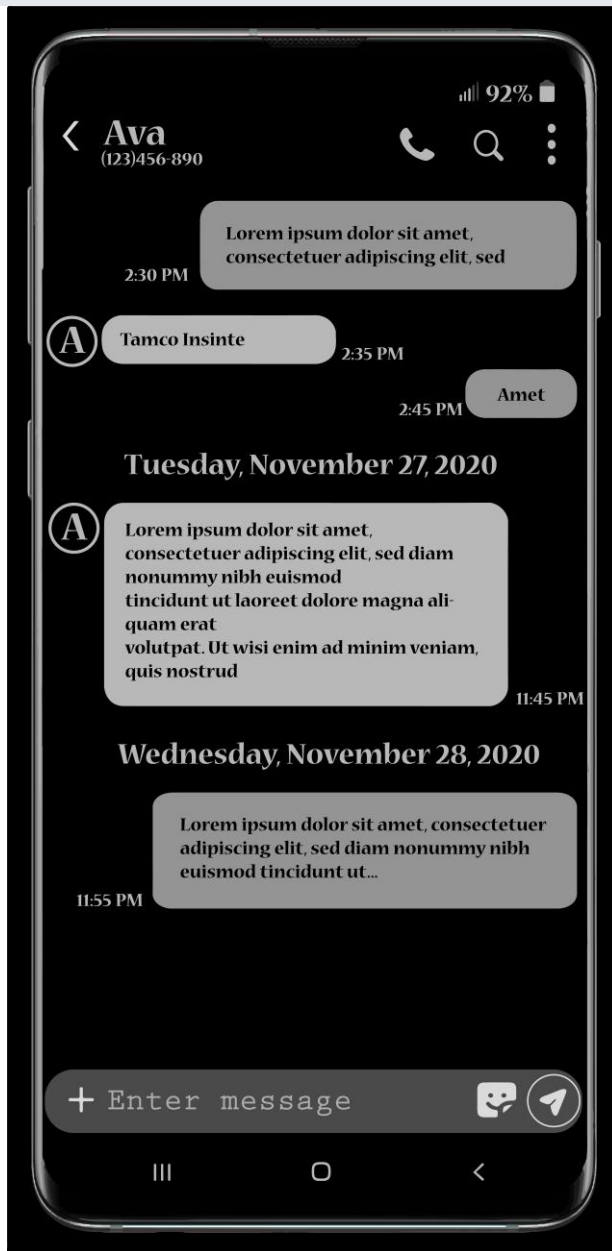

Fly High

-Islam Nusrat Akhi

I'm graduating in Computer Science in Italy. I'm very fond of the way various colours play roles in our lives, so I began taking interest in graphic designing.

I'd love to work as an UI theme developer and I believe Samsung platform can be my first step to it.

For the themes, I've taken inspirations from my surroundings. I've chosen for Mountain shade green colour family because I believe nature always presents itself with various shades.

Since summer has come and insects are all coming out, I chose caterpillar and ladybug as my second theme's subject.

The last one is related to my dreams, as I want to achieve my goals. So a butterfly, which after transformations, flies high, I want to see myself as a successful person.
